- All Sizes and Shapes available
- Precise shape
- Ease of Construction
- Looks exactly like real brick
- Availability

Chimney Types:

- Mid Ridge Chimney
- Mono Pitch Chimney
- Various Pot Options
- Corbel details available

Chimneys: grp chimneys

masonrysolutions offer a range of GRP chimneys to provide an extremely lightweight, affordable and easy way to add a chimney to a property. Whether a planning consideration or an aesthetic detail chimneys are a desirable addition to any property.

Glass reinforced plastic is now an accepted and fundamental material within the construction industry. With Health and Safety handling considerations GRP is now increasingly being used as a solution to handling and weight concerns.

The **masonrysolutions** GRP chimney range is manufactured in a new factory utilizing the very latest GRP techniques to produce products stunning in visual appeal and with lead in times that complement modern fast track construction methods. We offer a choice of sizes, brick textures to suit all brick types, capping details and pots. Our standard chimneys are also available with a corbel detail if required.

From a brand new manufacturing facility in the midlands we are ideally situated for deliveries on a national basis. This facility and the revolutionary production techniques employed is geared up to alleviate availability problems and offer a fast track as well as light-weight affordable solution.

The **masonrysolutions** GRP chimney range offers the latest technology to replicate brick colour and texture.

Samples of the actual brick are taken from site or pre ordered to ensure an exact match to the main brick being used in the construction.

Mid Ridge

Mono Pitch

Chimneys: grp chimneys

masonrysolutions offer a range of GRP chimneys. A saddle is incorporated at the base of the chimney to accommodate any roof pitch.

Any **brick colour and texture** can be replicated from a sample provided. Standard finishes are smooth, wirecut, stock and handmade.

Cappings and Pots. The standard capping is a GRP sandstone effect but a GRP terracotta effect red can be specified. Pots are GRP terracotta red effect.

Corbel Details are available for all of our standard sizes. These can be in the same or a contrasting brick.

Chimney Check List

- Chimney Type
- Size

Weston Mid Ridge Chimney

For details regarding the use of a class 2 flue please refer to our technical sales office

Standard GRP Chimney Range

Weston Chimney - 552mm x 440mm x 975mm high
Hampton Chimney - 777mm x 440mm x 975mm high
Blenheim Chimney - 1002mm x 552mm x 975mm high

All of the above are available as standard in either mid ridge or mono pitch in any brick effect finish.

Render effect is available in Hampton mid ridge and mono pitch only.

"The benefits of these chimneys are that they are extremely lightweight, look exactly like the real thing and do not need pointing on site.

Chimney Fitting

GRP Chimney being fitted in situ over two layers of roofing felt and screwed into the trusses. The lath is then put over the GRP saddle, the roof is tiled and then lead flashed.
